Theme Installation

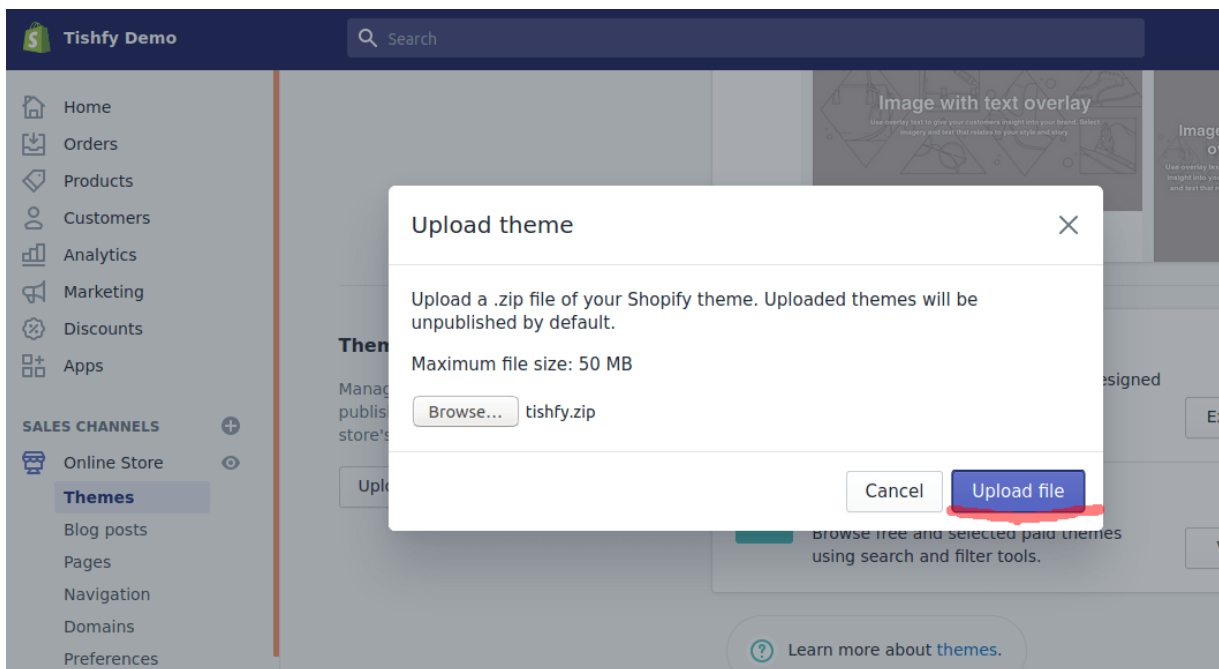

Login to your Shopify online store admin panel.

Navigate to Left Menu -> Online Stores -> Themes. Click on 'Upload Theme' button.

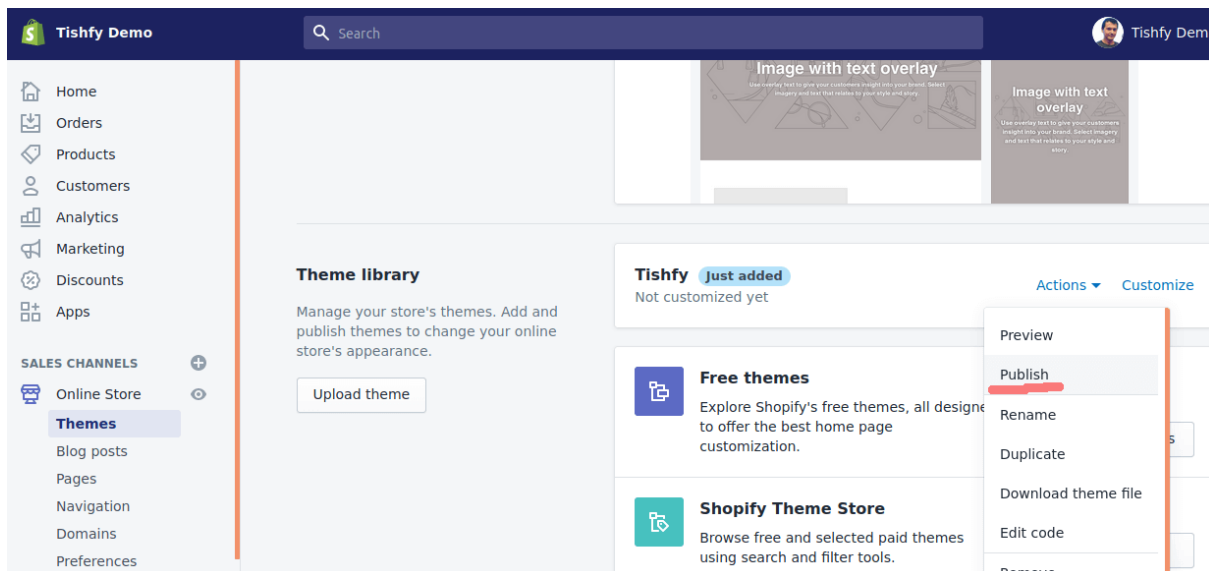

From newly opened 'Upload theme' dialog, click on 'Browse' button and select your Tishfy theme zip file.

Then click on 'Upload file' button

For new Tishfy theme in list of themes, click on 'Actions', and then click on 'Publish' button.

From the preview theme dialog click on ‘Publish’ button to confirm.

Tishfy Settings

Once Tishfy theme is installed and activated in your Shopify store, navigate to Admin Panel -> Left Menu -> Online Store -> Themes -> Tishfy theme section -> click on ‘Customize’ button -> click on ‘Theme Settings’.

Tishfy comes with the following Customize Sections:

General

General Section includes options to upload favicon image, change main colors (Main Color, Title Color, Text Color).

Header

It allows to you upload a logo image, set a Collection used for Main Menu, and configure Mega Menus:

Please Note: The mega menu are configured by inserting an HTML content (bootstrap HTML code for columns is also supported) into mega menu fields. The Mega menu fields number corresponds to the main menu sub-position where to display the mega menu content.

For example if you want to display Mega Menu content on third main menu item, you need to:

- Check the ‘Display Mega Menu Custom Content for Menu Item #3’ checkbox
- Insert content into ‘Megamenu Custom HTML block for Menu Item #3’ field

Please Note: By default Tishfy themes comes with pre-installed 3 and 4 columns content for Mega Menu which can be used as an example for configuring mega menu content in your site.

Homepage Slider

Tishfy theme comes with built-in Owl Slider on Homepage with default images, slides titles and text. You can change them from 'Homepage Slider' section.

Homepage Welcome Section

The Homepage Welcome Section allows you to insert content which is display only on homepage below the Homepage slider. It includes 2 fields:

- Homepage Welcome Title – title for the Section
- Homepage Welcome Text (HTML) – content to be displayed. You can enter the content in HTML. Here is an example of such content which we entered in our demo store.

Homepage Blog Posts

The Homepage Blog Posts section allows you to configure number of recent blog posts displayed on your Homepage.

Homepage Brands

You can display the brands your store offers (Brand images and URLs) in your Homepage (just above footer). Tishfy comes with pre-configured brand logos which can be used as an example.

Newsletter

The 'Newsletter' section includes settings for your newsletter subscription form. It includes the following options:

- Display Newsletter Form in Homepage – when checked the Newsletter will be displayed in Homepage.
- Title – the title text of Newsletter section
- Description – the description text of Newsletter section
- Newsletter Form HTML Code – a HTML form of your newsletter subscription form. You can insert any HTML form (provided by your Newsletter provider) into that field. An example HTML form is included by default.

Products

The 'Products' Section includes general settings for products displayed on your Shopify site such as:

- Products in Collection per Row

- Number of Rows per Collection page
- Display Collection Refinements Sidebar

Footer

You can insert content into your Footer split in 4 Columns (Titles and HTML content for each of footer sections). Tishy theme comes with pre-configured example footer content for address.

Import Products Demo Data

You can import products data from tishfy demo store in your Shopify store:

From your Shopify admin, go to Products > All products.

Click Import.

Click Choose File in the Import products by CSV file window.

Locate your 'Demo/tisfy_demo_products.csv' file, then click Open.

Click Upload file.

When your CSV file is uploaded you receive a confirmation email from Shopify at the email account that you used to set up your Shopify store.
